

SUNDAR RANGACHARI

AI-Augmented Data Architect & Lead Database Developer

AI-assisted engineering · LLM-driven development · Oracle PL/SQL · Data platforms for AI
Atlanta, GA · Sundar.rangachari@gmail.com · 914 441 7515

Executive profile

Lead database developer and hands-on Oracle architect with 25+ years turning complex, high-volume data estates into dependable platforms across healthcare payment integrity, banking, telecom billing, rail, energy and supply chain. Works AI-augmented: Cursor AI and Claude AI sit in the daily development loop for generation, refactoring and LLM-assisted review, with every generated artifact reviewed, tested and tuned before production. Individual contributor who leads: architecture first, performance always, human in the loop.

Signature outcomes

- **AI-augmented engineering.** Brought Cursor AI and Claude AI into daily PL/SQL development, legacy code review and documentation, shortening build and refactor cycles and raising code consistency across the team.
- **A platform built from zero.** Designed and delivered the Enterprise Content Library at Cotiviti, a custom Oracle platform unifying content from disparate legacy systems into one governed source, with the normalized data model, ERD and ETL owned personally.
- **Performance as a discipline.** Restored throughput on business-critical Oracle workloads through bulk collect redesign, partitioning, defragmentation and explain plan and TKPROF tuning, converting unpredictable long-running batch into runs the business can schedule around.
- **Modernization without disruption.** Carried VMS-era applications, Oracle Forms 6i estates and character-based systems onto modern Unix, Forms 10g and web platforms for British Petroleum, MIT and RGIS with service continuity throughout.

Core capabilities

AI-assisted engineering

Cursor AI and Claude AI for PL/SQL generation, refactoring and legacy comprehension; agentic, tool-using sessions for scaffolding, test data and documentation; LLM-assisted review of large legacy estates.

Data architecture & modeling

Logical and physical design, normalization, ERD, SQL Data Modeler, ERWIN, DFD, HLD and LLD, data migration strategy; lineage-tracked, retrieval-ready curation for AI and analytics.

ETL & integration

Extraction, transformation and loading, data warehousing and OLTP, integration with SAP, JD Edwards, Salesforce, BIOVIA and Microsoft portals.

Reporting & BI · OBIEE, BI Publisher, SSRS, Discoverer Plus, Analytic Workspace Manager, Crystal Reports. **Delivery** · Team lead and mentoring, code review culture, estimation, RFP and costing, migration and deployment strategy, SDLC documentation.

Professional experience

Cotiviti, Atlanta, GA

Jul 2024 - Present

Lead Database Developer & DBA · Oracle PL/SQL and DBA, 12c and 19c

- **AI in the daily loop.** Applied Cursor AI and Claude AI to PL/SQL authoring, legacy package comprehension and review, cutting the time between requirement and working code and making unfamiliar legacy logic accessible to the whole team.
- **Platform delivered end to end.** Built the Enterprise Content Library as a complete custom project, authored the normalized data model and ERD, and designed the ETL consolidating content from multiple source systems into one governed flow.
- **Throughput and resilience.** Re-engineered procedures and packages with bulk collect and bulk processing, and set backup and recovery strategy across RMAN, Data Pump and Streams with standby databases, cloning and patch management.

Merck Animal Health (through HCL), Atlanta, GA

Feb 2021 - Jun 2024

Lead Database Developer & DBA · HomeAgain platform, Oracle 12c and 19c

- **Legacy retired cleanly.** Migrated data from legacy systems into the HomeAgain application as database administrator, consolidating the operational record onto one supported platform.
- **Performance reclaimed.** Tuned legacy PL/SQL and partnered with hosting vendor Connectria on database-level tuning, lifting responsiveness on the workloads the business felt most.
- **Commercial systems connected.** Designed the ETL extracting operational data into Salesforce, and built reusable custom PL/SQL components replacing one-off fixes with supportable logic.

Cotiviti (through UST Global), Atlanta, GA

May 2019 - Feb 2021

Lead Database Developer & DBA · Enterprise Content Library, Oracle 12c and 19c

- **From concept to running system.** Established the Enterprise Content Library from a blank page: normalization, ERD, PL/SQL layer and ETL, creating the platform the later engagement would extend.
- **Tuned and assured.** Applied Oracle tuning and bulk processing so ingestion and retrieval held under production volume, and owned backup and recovery, capacity planning, replication and patching.

RGIS, Auburn Hills, MI

Apr 2018 - May 2019

Lead Technical Consultant · Billing Portfolio System, Oracle 11g-18c

- Built the Billing Portfolio System and integrated it into Oracle EBS; migrated Oracle Forms 6i to 10g and integrated BIOVIA workflow management, closing a manual laboratory-to-business handoff.

Verizon Wireless, Atlanta, GA

Oct 2015 - Apr 2018

Lead Technical Consultant · Telecommunications billing, Oracle 11g and 12c

- Design authority and production owner for telecom billing, database partner to a large Java engineering group, and the engineer who migrated remaining Open VMS scripts into Unix, retiring a long-carried platform dependency.

CSX, Florida

Feb 2014 - Oct 2015

Lead Technical Consultant · Rail transport systems, Oracle 12c

- Design and tuning authority for rail systems; resolved bottlenecks through query optimization and ADDM and AWR analysis, and wrote purge scripts adopted as the standard across every database in the estate.

Infogroup, USA

Nov 2012 - Feb 2014

Lead Technical Consultant · Marketing solutions, Oracle 11g

- Led product implementation and Unix shell automation; tuned top SQL by response time using explain plan, TKPROF and SQL Tuning Advisor, and recovered performance through defragmentation and partitioning without additional hardware.

MBIA, USA

Jul 2010 - Jul 2012

Lead Technical Consultant · Loan Putback System, financial guarantee insurance

- Designed and delivered Phase I of the Loan Putback System, tracking loans in breach of representations or warranties for repurchase at principal plus accrued interest, and built executive reporting in SSRS 2008, OBIEE and BI Publisher. Preceded by First Data Corporation (Jul-Nov 2012), Open Loop card platform production stability and CA-scheduled batch.

British Petroleum, UAE

Jun 2005 - Apr 2010

Lead Technical Consultant · Oracle PL/SQL, Pro*C and shell, E-Business Suite

- Solution architect across Oracle applications, platform migration and enterprise integration: migrated a large custom application to Oracle 10g, carried the MIT Boston VAX-based application onto Unix, delivered Microsoft Web Portal and JD Edwards integration, and mentored delivery teams on review, reuse and best practice.

Earlier experience

ICICI Infotech · Lead Technical Consultant 2004-2005

Sundaram Infotech · Assoc. Lead Technical Consultant 2003-2004

3i Solutions · Senior Systems Executive 1995-1997

Global Solutions · Software Developer 1993-1994

Focus Infotech · Senior Project Leader 1999-2003

Unraven Solutions · Systems Analyst 1998-1999

Sundaram Information Systems · Software Developer 1994-1995

Domain expertise

Healthcare payment integrity

Banking & financial systems

Credit card & dispute management

Animal health

Telecommunications billing

Rail transport

Energy & petroleum

Supply chain

Marketing solutions

Insurance

Leasing & bill discounting

Clients served · Galileo, Vadum, DataForce Systems, SoftBrands Hospitality, Cronos (UK), Baker Haus Veit (Canada), Custom Glass Products, Pliva, Massachusetts Institute of Technology, British Petroleum (UAE), Standard Chartered Bank (India, Malaysia and Thailand), Hindustan Lever, ICARDA (Syria), Electricity Holding Company (Oman), Diwan of Royal Court (Oman), Bank Sohar (Oman), Oman Telecommunications.
